## **SunSi To Acquire TCS Distribution Company**

### ***Will Begin Generating Revenues by July 2010***

**New York, May 11th, 2010** – SunSi Energies, Inc (OTCBB: SSIE) today announced that as part of its acquisition objective, SunSi Energies Hong Kong Inc. a subsidiary of SunSi Energies, Inc (“SunSi”, or the “Company”) has entered into a definitive agreement to acquire 90% of the Zibo Baokai Commerce and Trade Co. (“Baokai”). The Company expects the transaction to close no later than June 30, 2010. Currently, Baokai owns the exclusive distribution rights within China of the trichorosilane (“TCS”) produced by Zibo Baoyun Chemical plant (“ZBC”). 60% of Baokai was owned by an affiliate of ZBC, Mr. Song Yihua. On December 12th 2009, SunSi Energies Hong Kong Inc. secured the exclusive distribution rights from ZBC for the international market.

Upon closing, SunSi will own all of the distribution rights for 100% of ZBC’s production of TCS both within China, and outside of China. Upon closing, effective July 1, 2010 SunSi expects to begin generating between \$1.5 million and \$2.0 million in monthly revenue.

Commenting on the acquisition, Michel G. Laporte, Chairman and CEO said, "During the last nine months we have taken all of the necessary steps to consummate the acquisition of the ZBC factory. These steps include preparing GAAP audited historical financial statements for ZBC, and conducting extensive due diligence. Despite our best efforts, we have been unable to close on the transaction because certain deal conditions requested by SunSi, remain unsatisfied. Although there can be no assurance that we can complete the transaction, we are still hopeful that we will be able to resolve the open issues enabling us to close.

Further, Mr. Laporte stated, "In the interim we have taken the necessary steps to help position ourselves to achieve our objective of generating revenues and profits for the benefit of shareholders. In December 2009, we acquired the rights to distribute TCS outside of China. I am pleased to report today that we have now addressed the distribution of TCS within China through the signing of a definitive agreement with Baokai and can look forward to begin generating revenue by July 2010."

## **About SunSi Energies Inc. ("SunSi")**

SunSi is a US based company focused exclusively on acquisition and development of portfolio of high quality Trichlorosilane (TCS) producing facilities that are strategically located and possess a potential for future growth and expansion. Relatively unknown, but essential to the solar industry, TCS is its main feedstock due to its use in the production of polysilicon (a component of solar panels). TCS is considered to be the first product in the solar PV value chain before polysilicon, and is also the principal source of ultrapure silicon in the semiconductor industry. It is believed that SunSi is the first and only "pure play" public company in the world honed on the production and distribution of TCS. SunSi Energies Inc. is traded on the NASDAQ OTC Bulletin Board under the ticker SSIE. For additional information, please visit the Company's website: [www.sunsienergies.com](http://www.sunsienergies.com) or call Michel G. Laporte at Tel: 646-205-0291.

### **Forward-looking Statements:**

This news release contains forward-looking statements related to the future financial condition and results of SunSi's operations. These statements are based on current expectations and estimates about the trichlorosilane markets and industry in which SunSi operates, completing the Joint Venture transaction with ZBC as well as management's beliefs and assumptions regarding these markets, future growth prospects, the closing of the Baokai acquisition, the commencement of generating revenues in July 2010 and attaining an AMEX listing. These statements are subject to important risks and uncertainties, which are difficult to predict, and assumptions which may prove to be inaccurate. Some of the factors that could cause results or events to differ materially from current expectations include, but are not limited to: general economic conditions, market or business conditions; changing competitive environment; changing regulatory conditions or requirements; changing technology; raising sufficient capital and attaining the required number of shareholders to meet AMEX listing requirements, the price of TCS sold within China and outside of China, the level of production by the ZBC factory, and success in implementing productivity initiatives. Some of these factors are largely beyond the control of SunSi. Should any factor impact SunSi in an unexpected manner, or should assumptions underlying the forward-looking statements prove incorrect, the actual results or events may differ materially from the results or events predicted. All of the forward-looking statements made in this document are qualified by these cautionary statements, therefore, there can be no assurance that the results or developments anticipated by SunSi will be realized or, even if substantially realized, that they will have the expected consequences for SunSi. Readers should not place undue reliance on any forward-looking statements. Furthermore, SunSi disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or any other occurrence.
