

## **SunSi Provides Status Update on its Trading Symbol**

NEW YORK, NY (Marketwire-10/18/2012) SunSi Energies Inc. ("SunSi") (OTCQB: SSIED, SSIE), an international manufacturer, seller and distributor of energy products and solutions, announced trading of its common stock, effective today, would revert to its previous symbol of "SSIE". Previously, due to SunSi's 1-for-2 reverse stock split effected on October 9, 2012, the Company's stock temporarily traded under the symbol "SSIED."

### **About SunSi Energies Inc.**

SunSi Energies is a global company whose products and solutions focus on renewable energy and improved energy efficiency. SunSi's subsidiary, TransPacific Energy Inc. ("TPE") has patented a technology which uses proprietary multiple component fluids that are environmentally sound, non-toxic and non-flammable. Custom formulated mixtures efficiently capture and convert heat directly from the heat source at temperatures ranging from 80° F to 1000° F. TPE's technology offers applications at broader temperature ranges than other energy recovery systems. TPE's systems in certain applications reduce operating and maintenance costs thereby significantly improving return on capital expenditures thus making the purchase of waste heat recovery systems which previously yielded nominal savings, economically viable.

SunSi is the exclusive distributor in the U.S., Canada, and Mexico of Light Emitting Diode ("LED") commercial lighting products and fixtures for a premier LED manufacturer, Lightsky. An LED is a semiconductor device which converts electricity into light. The LED light is considered "green" because of the absence of dangerous chemicals and an accompanying significant reduction in energy consumption depending on the application, from 50% to 70% of traditional lighting products.

SunSi, is also a significant manufacturer and distributor of trichlorosilane ("TCS") in China. TCS is a specialty chemical primarily used in the production of polysilicon, which is an essential raw material in the production of solar cells for PV panels that convert sunlight to electricity. TCS is considered to be the first product in the solar PV value chain before polysilicon, and is also the principal

source of ultrapure silicon in the semiconductor industry. For additional information regarding SunSi Energies Inc., Transpacific Energy, Inc., or Lightsky please visit the companies' websites at [www.sunsienergies.com](http://www.sunsienergies.com), [www.transpacenergy.com](http://www.transpacenergy.com), [www.lightsky-led.com](http://www.lightsky-led.com) or contact Richard St-Julien at (646) 205-0291.

### **Forward-Looking Statements**

Except for statements of historical fact, the matters discussed in this press release are forward-looking. "Forward-looking statements" describe future expectations, plans, results, or strategies and are generally preceded by words such as "future," "plan" or "planned," "expects" or "projected." These forward-looking statements reflect numerous assumptions and involve a variety of risks and uncertainties, many of which are beyond the company's control that may cause actual results to differ materially from stated expectations. Some of the factors that could cause actual results to differ materially from the forward-looking statements contained herein are detailed in documents we file from time to time with the Securities and Exchange Commission, which are available at [www.sec.gov](http://www.sec.gov).
